

# Winc Technology solutions.

Now's the time to think about all things tech to take advantage of the new investment tax break.

Not across the instant asset write-off scheme? **Read our guide** that covers everything you need to know.

At Winc, our technology specialists can review your technology set up and identify the best solutions for your business needs. Whether you need a complete organisation-wide tech refresh or just upgrade a few tech assets, we can provide you with a consistent, intuitive and fully optimised technology experience, all in one place.

## Our services include:

**Asset tagging and reporting**  
Identify, track and secure your assets.  
Full asset reporting at the completion of every job.

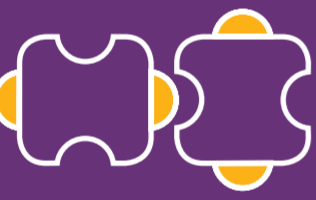

**Centralised configuration management**  
Gain direct access to our secure facilities via VPN to complete configuration tasks. Have full control by making changes in real-time.

**Hardware & software configuration services**  
Integrate non-standard hardware and software components into your systems including installation of modules, software and memory upgrades.

**Dedication Facility**  
Our purpose-built facility has the capacity to configure up to 400 machines across 7 imaging benches (36 network/32KVM ports per bench).

**Integration services**  
Our experts can engineer, integrate, and install your storage, server or networking solutions into your data centre.

## We specialise in:

Computers & Accessories

Audio & Visual

Thermal Imaging

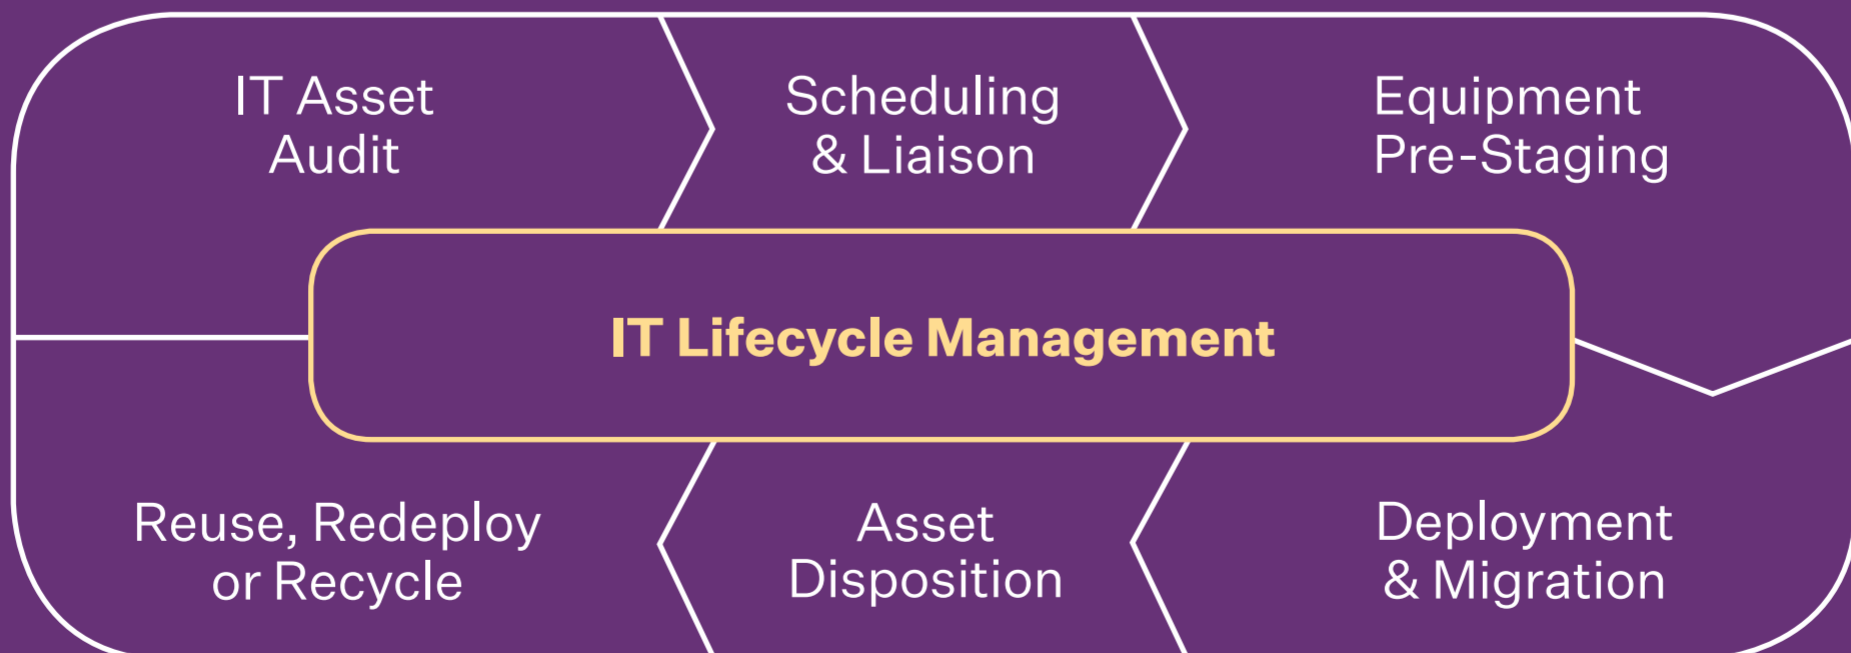

Managed Services

Device Configuration

Digital Signage

Now may be the time to invest in products your workplace needs to run smoothly.
